INNOVATION MEETS
VISION

About Us

Power Control Co. Ltd. delivers reliable power solutions that keep businesses running, industries thriving, and critical operations uninterrupted. Since 2018, we have grown from a small sales and service company into a trusted asset in the power generation industry.

What began with generator sales, rentals, and maintenance has evolved into a comprehensive suite of power solutions, including power plants, mobile generators, load banks, and light towers. Beyond conventional generator services, we deliver tailored, high-performance energy solutions designed to meet the highest international standards of efficiency and reliability.

Vision

We strive to be the leading provider of intelligent and sustainable power solutions, setting new industry standards through innovation, reliability, and exceptional service, in order to empower businesses and industries with seamless, uninterrupted energy solutions.

Mission

We are committed to delivering high-performance power solutions that ensure operational continuity and efficiency through providing reliable generator sales, rentals, and maintenance services.

Unique Edges

End-to-End Power Solutions:

01

A comprehensive portfolio encompassing sales, installation, rental, and maintenance services.

24/7 Emergency Support:

02

A dedicated team providing round-the-clock service to ensure operational continuity

Uncompromising Quality Standards:

03

Adherence to the highest international safety and performance standards and best practices.

Custom-Engineered Power Solutions:

04

Tailored solutions designed to meet the most complex and demanding power requirements.

Extensive Inventory of essential Spare Parts:

05

Immediate availability of essential components, ensuring minimal downtime.

Advanced Technological Integration:

06

Utilization of state-of-the-art generator control systems and technologies.

Products Portfolio

01 Diesel Generators

Our diesel-powered generators are designed for standby, prime, and continuous power applications, offering exceptional fuel efficiency and performance across various industries.

02 Load Banks

We provide resistive and reactive load banks for generator testing, commissioning, and maintenance, ensuring equipment readiness and optimal load performance.

03 Light Towers

Our high-intensity, mobile light towers offer powerful illumination for construction sites, outdoor events, emergency response, and industrial operations.

04 Control Panels & Synchronization Systems

We integrate state-of-the-art control panels and synchronization systems for smooth power management, and scalability.

05 Spare Parts & Accessories

We maintain a vast inventory of essential original spare parts and accessories, including filters, alternators, sensors, batteries, cables, and power distribution components, ensuring quick replacements and minimal downtime.

Services

Power Control Co. Ltd. offers a comprehensive range of power solutions tailored to meet the most demanding operational requirements, including:

01 Generator Sales & Installation

We offer an extensive range of diesel generators, with capacities ranging from 10KVA to 2000KVA, suitable for residential, commercial, and industrial applications. Our experienced team ensures seamless installation, synchronization, and integration with existing power systems for optimal performance.

02 Generator Rentals

Our flexible rental solutions provide reliable power for temporary needs, whether for planned maintenance, construction sites, special events, or emergency backup. Clients can choose from short-term and long-term rental plans, with full support and maintenance services included.

03 Preventive Maintenance & Service Contracts

Regular maintenance is key to ensuring long-term generator performance. Our customized service contracts offer scheduled inspections, oil and filter replacements, performance testing, and troubleshooting to prevent unexpected breakdowns.

04 Technical Consultancy & Assistance

Our specialists provide expert guidance, system assessments, and feasibility studies to help clients select and implement the most efficient power solutions. We also supply comprehensive technical documentation and support.

05 Power System Design & Integration

We engineer custom power solutions tailored to each client's operational requirements, incorporating advanced automation, load balancing, and synchronization technologies for enhanced efficiency and reliability.

06 Training & Knowledge Transfer

We offer specialized training programs to equip our clients with the knowledge and skills to operate, maintain, and manage power generation equipment efficiently.
